To Much Sun?

It's easy to do!
Get to much summer sun.

With all the outside fun and time at the lake, spending to much time
in the sun can be hard on your skin.

If you've had to much sun this summer and your skin is pink and
dry, what can you do?

The first thing to do is stay out of the sun until your skin has healed.
Cover up!

Next, make sure to keep your skin moisturized!
It's easy for skin to get dry and flaky.

Try our super moisturizing Body Frostings or use our fabulous
Shower Butters to combat dry summer skin.

Remember, always wear sunscreen and apply plenty of moisture
after, when you are out enjoying these beautiful summer days!

Dry skin is never any fun!
