We're really in the pampering mode this week in Wickedly Chic. Meet another midwest-based indie business, [Blissful Bath](#). In my humble opinion, this is the perfect place for reasonably priced bath products for the bathing beauty. In these stressful times, there's nothing better than a good soak in the old bathtub.

Blissful Bath has stuff for your bath that is so adorable that you might not even want to use it. But you can't worry about that...because they'll just make more...and you'll want to buy it.

The perfect & almost edible cupcake pictured here is actually for your bubble bath. There's a regular cupcake bubble bath and a fizzy cupcake. We were equally in love with Blackberry Brew, Happy Birthday and Berry Yummy. All fabulous.

contains green tea and shea butter. It's a tad heavier than the Regenerating Cream...yet feels wonderful on skin. For face washing, their Cream Cleanser is a good option...this product contains avocado oil and rose water and is fast becoming a favorite.

Bath bombs are huge and moisturizing. We sampled I Dream of Sleeping (my absolute favorite!), Orange You Spicy and On Dancer On Dasher. These are custom blended fragrances that you will not find anywhere else.

If you're a shower type of gal, don't miss the Shower Butter which is a compact & fragrant smelling moisturizer that you use in the shower. I loved Kisses from Kauai. It really kept my skin soft all day long.

There are so many fab products in this shop...& something for everyone in your family. Take advantage of their shipping special. **All orders over \$25.00 ship for free!** How can you beat that? Stop by today.
